CARBON REACTIVATION

How it makes cents!

G

For many years the low cost of carbon and the high cost of energy made reactivation less attractive than disposal. With carbon prices rising over 50% in the past couple of years reactivation has now become an economically sound option.

O

Here are just a few benefits to recycling your spent carbon:

COST SAVINGS:

Reactivation: Send your spent carbon back to our facility for regeneration, you save the disposal cost.

G

Custom remanufacturing: Send us your spent carbon for remanufacturing for your own reuse., you pay for the reactivation service.

The above programs require minimum quantities.

r

LEED CERTIFICATION:

Recycling your carbon by remanufacturing helps your clients with Leed Certifications by reducing the amount of waste they send to the landfill.

e

Now is the time to be environmentally and economically conscious. In many applications the use of remanufactured carbons will be as effective at molecular filtration as will a virgin carbon.

e

Please call or email at us to discuss setting up a reactivation program for your used carbons.
