

CAMERON GREAT LAKES, INC.

MOLECULAR FILTRATION SPECIALISTS

Vapor Trap –DF Dusting Filter

- **Negates downstream dust**
- **Lower pressure drop than bonded panels**
- **Performance uncompromised by binders**

Don't compromise performance for fear of generating dust. The Vapor Trap DF filter allows the end user to have the best of both worlds; a bulk fill carbon filter whose efficiency is not comprised by adhesives, long life with high carbon weight, and a dusting filter that prevents small particulate matter from traveling downstream of the filter.

The Vapor trap DF is ideal for the semiconductor industry and any other applications where dusting is a concern.

Dusting with bulk carbon filters most often occurs upon initial start up. Transportation of the filters causes dusting which upon installation in the airstream may travel downstream a short distance. If dusting is an issue upon receipt of the filter shake out any loose material caused from transport and then install into the airstream. The downstream dusting filter will then provide the added protection for the life of the filter.
